

DueFocus Pitch Deck

Problem

The current tools available aren't flexible and don't provide true insights on time and team management

(1) There's no one tool to show how employees and teams are really use their working time

(1) Transparency of the workflow is still a big question for both individuals and teams

() KPI metrics are collected from different sources and tools

It is still hard to identify periods of highest productivity at work for every individual

DueFocus - easy-to-use time tracking & productivity software that:

- Provides personal metrics of productivity
- Helps control distractions
- Helps to delve into deep work
- Provides in-depth performance analytics powered by machine learning
- Makes workflow transparent and well-organized
- ✓ Identifies best periods of work for each individual

User testimonials

I'm really happy with this app because this is something I was looking for at cheap price and fortunately I found it. The plus is I'm getting features like, activities, screenshots and invoices all in one app. That's why I'm planning for going on long term basis and enjoying this time tracking software.

Imran Z., Senior Developer

Your time tracker is incredible. Now I finally found the solution for both employees and clients. Our team is doing things way faster and finally we don't have to worry about our earnings. Thank you.

Catherine S., Design Team Lead

Thanks guys, you are doing a great job. Honestly right now you blow away any of the competitors by having direct integration with 99% of the other toolsets I use. The fact I can hit one button and it blows up my slack/gcaht feeds. I love your time tracking app. Keep it up!

Noah H., Founder of Chromakey.io

Who we are now

Roadmap

Restructuring the system architecture to improve the management of roles and projects within the application Implementation of the project state prediction system (budget/timeline) based on task estimation and the developer's metrics Revision of self-host solutions for b2b needs Improvements to the internal DueTask task manager, and opening its API to provide the user with maximum customization

Accumulation and classification of ML personal metrics of focus and building a rating system for user roles Improve current features and UX based on advanced user research Implementation and inclusion of monetization

Increase sales funnel conversions

Productivity Isn't About Time Management. It's About Attention Management,
