Why track your productive hours?

US economy loses 50 million hours in productivity per day because of unrecorded work activities.

Time tracking is essential

Existing productivity tools and time tracking software still can't answer critical questions:

- A How employees are really use their working time?
- What's their true contribution to projects?
- What major factors had an impact on the achievement of objectives?

Time tracking with DueFocus

With DueFocus, you'll always be a master of your time. Workflow is transparent and well-organized. You'll know who is doing what, by when and will be aware of all activities during the day.
